* The financial year of Melbourne and Geelong ends on the 31st August, that of all other municipalities on the 30th September.——† Including expenses of audit, collection of statistics, making valuation, commissions paid in lieu of salaries, &c.——‡ In many instances the value of town halls, furniture, waterworks, &c., has been reckoned by the municipal authorities as part of the assets.——§ In this column the amounts of outstanding loans have been included with the liabilities.——‖ The borough of Northcote having only recently been formed, its statistics are still included in the shire of Jika.

NOTE.—The revenue of and expenditure on local waterworks are not included. The returns of revenue and expenditure represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to ensure uniformity and accuracy, therefore, the returns in which these items were in the first instance included have been corrected from the printed balance-sheets.

* Including expenses of audit, collection of statistics, making valuation, commission paid in lieu of salaries, &c.——† In many instances the value of shire halls, furniture, plant, &c., has been reckoned by the authorities as part of the assets.——‡ In this column the amounts of outstanding loans have been included with the liabilities.

NOTE.—The revenue of and expenditure on local waterworks are not included. The returns of revenue and expenditure represent the *net* receipts and expenditure of the year under review, exclusive of credit and debit balances, bank overdrafts, loans, &c.; to ensure uniformity and accuracy, therefore, the returns in which these items were in the first instance included have been corrected from the printed balance-sheets.

[1] The items in this Table are summarized according to a principle agreed to at a conference of Government Statists of several of the Australian colonies, held in Tasmania in the month of January 1875.—— [2] During and after this year, four-fifths of the Wharfage Rates for the Port of Melbourne, which had previously formed part of the Customs revenue, were transferred to the Harbour Trust.—— [3] Including revenue from Beer and Tobacco Duties, amounting to £84,429 in 1880-81, and £216,547 in 1881-2. The duties were first imposed on the 1st November, 1880. The Beer Duty expired by effluxion of time on the 31st August, 1882.—— [4] Including a proportion, amounting to £4,600, of Publicans' License Fees, &c., received, for the first time, under Act 40 Vict. No. 566, section 111.—— [5] For six months only.—— [6] The amount of Land Tax payable annually varied from £126,000 to £124,000. The fluctuations in the revenue above and below this limit are due to the irregular payments of the tax.—— [7] For about six months and a half only. The duty was imposed on the 18th December, 1879.—— [8] Including, for the first time, revenue derived from the Melbourne and Hobson's Bay system, recently purchased by the Government, amounting to £203,679. This amount consists of £43,728 net revenue for 1878-9, and £159.951 gross revenue for 1879-80.—— [9] For details of this item, see Supplementary Table, *post*.—— [10] Not including £500,000 raised by means of Treasury Bonds.

HENRY HEYLYN HAYTER, Government Statist.

[1] The items in this Table are summarized according to a principle agreed to at a conference of Government Statists of several of the Australian colonies, held in Tasmania in the month of January, 1875.

[2] Including Governor's salary, and salaries of Ministers, Commissioners of Audit, Agent-General, and expenses of Executive Council in all the years; also Public Worship until the middle of 1875-6, when State Aid was abolished.

[3] Including cost of the following departments:—Chief Secretary, Shorthand Writer, Agent-General, Audit Office, Registrar of Friendly Societies, Inspector of Stock, Treasury, Stores and Transport, and Government Printer.

[4] Including expenditure under the following heads:—Education, Government Statist, Observatory, Government Botanist, Public Library, Museums and National Gallery; Grants to Mechanics' Institutions, Free Libraries, &c., and Grants to Schools of Mines and Design.

[5] Since 1874-5 the amount expended on school buildings has been paid entirely out of loans.

[6] Including expenditure under the following heads:—Chief Medical Officer, Central Board of Health, Hospitals for Insane, Industrial and Reformatory Schools, and Grants to Charitable Institutions.

[7] This account was created under the *Land Act* 1869 (33 Vict. No. 360, secs. 42 and 43), whereby it was provided that an amount of £200,000, proceeding from the alienation of land, should be placed annually to a trust account, the moneys standing to the credit of which should be available for the re-purchase of debentures, or the further construction of railways. The total amount paid to this fund in accordance with these provisions, up to the 30th June, 1882, was £2,200,000, all of which, with the exception of a balance of £36,224, had been expended on the survey or construction of lines of railway. As no payment was made in 1879-80, the final payment was not made until 1881-2, the Act having previously expired on the 31st December, 1880.

[8] Exclusive of School Buildings, Railways, Water Supply, and of all public works paid for out of loans. Including endowments of municipalities under the *Local Government Act.* The expenditure on the Port of Melbourne, included under this head prior to the 1st January, 1877, has since been paid out of the Harbour Trust Fund.

[9] The provision of the *Local Government Act* 1874, authorizing the annual subsidy of £310,000 to municipalities, having lapsed on the 31st December, 1879, amounts equivalent to the subsidy have since been voted by Parliament. This accounts for the gradual transfer of this item of expenditure from "Special Appropriations" to "Votes."

[10] The amounts under the head of "Special Appropriations" represent, as nearly as possible, the net expenditure on account of Steam Postal communication (including gratuities to masters of vessels), the contributions by other Governments having been deducted.

[11] The annual subsidy to the Mint is £20,000; portion of this sum, however, has been repaid each year to the revenue.—See Table of General Revenue, *ante*, under the head "Mint Subsidy returned."

[12] Chiefly interest and expenses in connexion with the Melbourne and Hobson's Bay Railway Debentures.

[13] Extensive reductions in the Public Service were made in the years 1877-8 to 1879-80, which caused an increase in the amount of retiring allowances, gratuities, and compensations.

[14] Including a vote of £2,600 in 1880-81, of £5,000 in 1881-2, and of £8,000 in 1882-3, to meet deficiencies in the Police Superannuation Fund.

[15] Including £10,207 paid as compensation to officers whose services were dispensed with between the 8th January and 9th April, 1878.

[16] For details of expenditure from votes under this head, *see* Supplementary Table, *post.* The amounts in the column for Special Appropriations are the unexpended balances of the Pension Fund (Schedule D, Part V.), repaid each year to the revenue.

[17] Not including £471,900 in 1881-2 and £18,000 in in 1882-3 expended towards the redemption of Treasury Bonds.

NOTE.—For items of expenditure out of Loans raised under various Acts for the purposes of Water Supply, Railways, Public Buildings, State School Buildings, and Alfred Graving Dock, *see* Table of Loan Account Expenditure, *post.*

* Police pensions are not included in this table, as only £2,000 out of the whole amount (£11,543) is appropriated from the General Revenue —*see* last footnote to preceding table.

† Embracing the pensions of Lady Darling, of Mrs. Petrie, of Ministers relieved from office on the introduction of Responsible Government and on political grounds, and the Superannuation Allowance of Mr. G. W. Rusden, formerly Clerk of the Legislative Council and Clerk of the Parliaments.

NOTE.—The pensions and superannuation allowances referred to in this and the preceding table are those which would be payable supposing the whole to be in existence throughout the 12 months. In consequence, however, of some of the allowances not commencing until the year has more or less advanced, in consequence also of some of the old ones falling in during the course of the year through the death of the recipients, the amount actually paid is always less than the amount shown on the list. The material for this return has been derived from statements furnished each year by the Honorable the Treasurer.

*** *In order to save time, the returns of Imports and Exports are published alphabetically as furnished by the Customs Department, instead of in classified arrangement as in the case of the Imports and Exports for 1875. In the "Victorian Year-Book, 1883–4," now being printed, the Import and Export entries will be found duly classified according to the system agreed upon at the Statistical Conference held in Tasmania in January, 1875. (See Report of Conference, Parliamentary Paper No. 11, Session 1875.)*

* Including wharfage and harbour rates for all the ports prior to 1st July, 1877. On that date the wharfage rates for the port of Melbourne, amounting to over £100,000 per annum, were transferred to a Harbour Trust. A fifth part of these rates is still, however, paid into the consolidated revenue, and is included in this return. It amounted to £10,776 in the six months of 1877; to £21,183 in 1878; to £18,924 in 1879; to £16,910 in 1880; to £20,762 in 1881; to £26,524 in 1882; and to £18,234 in 1883.——† Including excise duty paid direct into the Treasury.——‡ Including export duty on redgum timber. The whole amount collected in 1877 and portion collected in 1878 was, however, subsequently remitted.——§ Including export duty on scrap iron.

† In this column, in addition to the single journeys and to the return journeys (each counted as two), an estimate has been made of the number of journeys made by periodical ticket holders. This only applies to the Suburban lines, as upon the others neither return nor periodical tickets are issued.

‡ These railways were purchased by the State in 1879 from the Melbourne and Hobson's Bay United Railway Company.

§ In 1881, 1882, and 1883 the amounts paid on account of compensation to persons injured in railway accidents were unusually heavy, viz.:—£45,160, £114,587, and £25,802 respectively.

NOTE.—This table has been compiled by the Government Statist from returns furnished each year by the Railway authorities, supplemented by information obtained from the annual reports of the Board of Land and Works.

* It is believed that the estimate of the population of Hotham given for the four years 1874 to 1877 was too high. The municipal authorities state that the figures furnished for subsequent years are reliable.—— † Until 1879 the figures of the Census 1871 have been given for the population of the Shipping; for 1880 and subsequent years those of the Census 1881.

* It is believed that the estimate of the population of Hotham given for the four years 1874 to 1877 was too high. The municipal authorities state that the figures furnished for subsequent years are reliable.——† Until 1879 the Census figures 1871 have been given for the population of the Shipping; after that period, the Census figures 1881.

NOTE.—This table, which is supplementary to the preceding one, does not include all the public institutions in Melbourne and suburbs, but only such as have a high rate of mortality, and consequently would, if included, have a tendency to swell the general mortality of the sub-districts in which they are situated. In 1883 the deaths in all the principal public institutions—including, besides those enumerated above, gaols and penal establishments, industrial schools, orphanages, female refuges, &c.—numbered 1,202, particulars of which will be found in various portions of the *Statistical Register*. The numbers given are those of deaths *registered* during each year, and consequently may not agree exactly with those which actually occurred in the institutions during the same period.

* Including Hospital for Diseases of Women and Children. Deaths of infants born in the institution are also included.

† Deaths in this hospital were not eliminated for the purposes of this table prior to 1881.

OCCUPATIONS OF MALES AT DEATH.—CLASSES.

⁂ The occupations at death, as given in this and the three following tables, are in some respects not fairly comparable with the occupations of the living population as returned at the Census. It is found that the latter, being returned by the persons themselves, are generally more accurately defined than the former, which are necessarily returned by others. As, for instance, many of the 2,216 undefined labourers who died would probably be returned at the Census under the special industry in connexion with which they worked, *e.g.*, store labourers, farm or station labourers, road or railway labourers, &c. The fact of their being entered simply as labourers in the death registers would, of course, swell the mortality of labourers undefined, and to the same extent would lower that under the other heads.

* In 1863–4, 1864–5, and 1878–9, the yield of wheat was much affected by “rust.’

† The tobacco crop in 1875–6 and 1879–80 failed in most of the districts.

Note.—It is to be borne in mind, with reference to the returns of vines, that whilst the acreage of vines, in common with the remainder of the Statistics, is for the year ended 1st March, 1884, the quantity of grapes gathered and of wine and brandy made are for the previous season. The grape crop comes in too late to admit of its being returned when the Agricultural Statistics are collected.

* The returns furnished by the Collectors of these Shires have been found to be, in some cases, unreliable.

NOTE.—When a farm holding extends into two or more municipal districts, it is returned as being in the district wherein the homestead is situated.

HENRY HEYLYN HAYTER, Government Statist.

IRRIGATION.—(I.)

*** The three following Tables relating to Irrigation are supplementary to the Summaries of Shires at pages 12 and 14 *ante*. In the case of crops subjected to irrigation in any Shire, the extent of land not so subjected and so subjected is given in the first Table, and the produce grown under each of those conditions in the second Table. No figures are given respecting crops in any Shire of which no portion within such Shire was subjected to irrigation.

NOTE.—The items in this Table do not represent the whole area under the respective crops grown, but only of such as were taken cognizance of by the collectors. The minor crops are often raised in gardens, in which case the various descriptions would not be distinguished. They may be also grown upon allotments of one acre and less in extent, and these the collectors are not called upon to visit. The Table must, therefore, be looked upon as indicating the nature of certain crops grown in Victoria rather than the full extent to which those crops are cultivated.

* A large plantation of mulberry trees was reported to have been abandoned.——† Of this area, 10 acres of wattle trees were reported to have failed. It is presumed that trees are only included in the tillage of the year in which they are planted.——‡ Reported to have failed.

NOTE.—The items in this Table do not represent the whole of the respective crops grown, but only such as were taken cognizance of by the collectors. *See* footnote to Table on previous page.

NOTE.—Much higher rentals are occasionally obtained for land specially adapted for certain crops. Thus, in Benambra and Bogong, a rent of from £3 to £4 per acre is given for land suitable for the growth of tobacco; in the neighbourhood of Melbourne, a rent of from £2 to £6 per acre is paid for market gardens; and in the county of Villiers, from £4 to £5 10s. per acre is sometimes the rental for a sufficient period to grow a single crop of potatoes—say about nine months.

* The figures in this column apply to purchased lands only. One hundred and ninety-six of the manufactories were carried on upon Crown lands; in these cases no valuation of the land has been made.

† Water-works have not been included, as they are not, properly speaking, manufactories. A Table of all the water-works in the colony is published at page 65, *post.*

‡ These particulars have been combined, in accordance with a promise made to the persons supplying the information that the contents of individual schedules would not be published.

* The figures in this column apply to purchased land only. Twenty-four of the stone quarries were on Crown lands, and in these cases no valuation of the land has been given.

† These particulars have been combined, in accordance with a promise made to the persons supplying the information that the contents of individual schedules would not be published. One of the stone quarries to which they relate was situated in the town of Ballarat East, and one each in the Boroughs of Belfast and Rutherglen; and one in each of the following Shires:—Beechworth, Braybrook, Creswick, Keilor, Maffra, Merriang, McIvor, Nunawading, South Barwon, Warrnambool, and Yackandandah.

EXTENT AND VALUE OF GOLD WORKINGS.

Return showing the Number of Distinct Quartz Reefs actually proved to be Auriferous, the Total Extent in Square Miles of Auriferous Alluvial and Quartz Ground actually worked upon, and the Estimated Value of Gold Mining Claims, and Lands held under Gold Mining Leases, in the several Mining Districts, on the 31st December, 1883.

Mining Districts.	Number of Distinct Quartz Reefs proved to be Auriferous.	Extent in Square Miles of Auriferous Alluvial and Quartz Ground worked upon.	Estimated Value of Gold Mining Claims and Lands held under Gold Mining Leases.
			£
Ballarat District	351	187½	1,314,300
Beechworth District	1,005	385¾	290,400
Sandhurst District	783	152	3,875,400
Maryborough District	634	137¼	387,498
Castlemaine District	411	176	436,730
Ararat District	82	92½	88,600
Gippsland District	513	222¾	516,105
Total	3,779	1,353¾	6,909,033

Note.—The number of "distinct" quartz reefs cannot be strictly correct, as parts of the same reef, in some localities, are held to be distinct reefs, and named accordingly. As the reefs are further explored, it is found, too, that what were supposed to be separate reefs are not really distinct. The extent of auriferous ground is here put down from estimates made by the Mining Surveyors and Registrars, not from actual surveys; and in a few instances the estimates of the present Surveyors and Registrars differ from those made by their predecessors. The figures vary from year to year; and as the shallow alluviums of the older goldfields are abandoned by the miners, they are taken up and occupied, under the provisions of the Land Act, by agriculturists and gardeners, consequently ground which one year was included in the estimated area of gold workings is excluded in another.

This Return has been received from the Mining Department.

AVERAGE YIELD OF AURIFEROUS QUARTZ.

Return showing the Average Yield of Gold from certain parcels of Quartz Crushed in 1883 in the several Mining Districts, from Returns made by the Mining Surveyors and Registrars.

Total	924,430	19	440,686	9	2	0	9	12·82

Note.—The above Table does not show the total quantity of quartz crushed in the several localities, but only the yield of certain "crushings" respecting which the Mining Surveyors and Registrars have been able to obtain information. Owing to the circumstance that many of the machine-owners are unable to give, or are precluded from giving, information, it is impossible to get complete returns from every district, and, in considering the relative importance of each district as regards quartz mining, the Tables relating to machinery should be examined and compared.

Since the first publication of the Statistics, information has been obtained concerning 20,054,884 tons 4 cwt. which have been crushed, and yielded 10,617,679 ozs. 1 dwt. 4 grs. of gold, being an average of 10 dwts. 14·12 grs. per ton.

This Return has been received from the Mining Department.

PRODUCE OF GOLD FROM QUARTZ VEINS AND ALLUVIAL WORKINGS.

Return showing the Total Amount of Gold raised according to Estimates made by the Mining Registrars, and that Purchased in Melbourne from private sources by the Royal Mint, Banks, &c., during the Year 1883.

NOTE.—The patents applied for numbered 1,097 during the period from 1854 to 1867, both years inclusive; 124 during the year 1868; 139 during 1869; 119 during 1870; 133 during 1871; 122 during 1872; 146 during 1873; 147 during 1874; 154 during 1875; 155 during 1876; 145 during 1877; 147 during 1878; 158 during 1879; 176 during 1880; 197 during 1881; 242 during 1882; and 249 during 1883. The discrepancy between the actual numbers and those obtainable by adding up the columns may be explained by the fact that many patents refer to more than one subject, and have, consequently, to be classified under two or more headings.

[1] The figures of Revenue and Expenditure are for the 12 months ended 31st December of each year until 1871, when the financial year was changed so as to terminate on the 30th June. The figures for 1871 are therefore for the six months ended 30th June, and the figures for subsequent years are for the twelve months ended 30th June.

[2] In addition to the quantity of land sold and amount realized within the year, the figures under the head "Land Sales" represent, during each of the years after 1868, the total extent of, and amount paid on, lands purchased under deferred payments of which the payments were completed within the year, although such payments had extended over a series of years. The extent selected, of which the purchase had not been completed, is not included in the area sold. This amounted, at the end of 1883, to 7,583,715 acres. Lands granted without purchase, which amounted up to the end of 1883 to 9,133 acres, are also excluded.

[3] Since the year 1864, a considerable quantity of wool has each year been imported into Victoria across the Murray, from the Riverina district of New South Wales, for transport by railway to Melbourne and shipment thence. Prior to 1872 no precise record of the quantity so introduced was kept at the Customs. It has, however, been ascertained that at least 13,000,000 lbs. of wool, valued at £972,000, crossed the Murray into Victoria in the year 1870, and the following amounts in the years named:—19,552,598 lbs., valued at £1,096,772, in 1872; 31,542,913 lbs., valued at £1,745,550, in 1873; 35,332,089 lbs., valued at £1,975,879, in 1874; 40,535,081 lbs., valued at £2,260,799, in 1875; 44,430,185 lbs., valued at £2,039,009, in 1876; 37,647,218 lbs., valued at £1,661,868, in 1877; 43,357,702 lbs., valued at £2,081,368, in 1878; 46,561,653 lbs., valued at £2,338,670, in 1879; 54,865,967 lbs., valued at £2,720,612, in 1880; 55,090,294 lbs., valued at £2,594,240, in 1881; 44,213,260 lbs., valued at £2,224,512, in 1882; and 29,072,345 lbs., valued at £1,355,219, in 1883.

[4] The quantities of flour, bread, and biscuit imported and exported are reduced to their equivalent in bushels, on the assumption that one bushel of wheat produces 45 lbs. of either of those articles.

[5] The births and deaths given for 1853 are all of which there is any record; but it is known that the figures considerably under-state the truth, and it is supposed that each in reality amounted to not less than 5,000. The deficiency has chiefly arisen from the fact that the system of registering births and deaths was entirely changed during the year 1853, and the new system was not at first properly understood. In consequence of this, and also owing to the unsettled state of the goldfield population, it is known that many children born were neither baptized nor registered, and many persons who died were buried without registration or funeral service.

[6] Post cards first issued in April of this year.

[7] Prior to 1871 the expenditure was for the year ended 31st December. The figures for 1871 relate to the first six months only. Since that date they have been for the year ended 30th June, except as regards the Railway expenditure, which in 1876 is for the eighteen months ended 31st December, and for subsequent years the twelve months ended 31st December. The figures do not in any case include amounts expended by municipal governments.

[8] These returns are those of the Government and private railways combined, the latter of which were purchased by the State in July 1878. The returns of the former are, prior to 1871 and subsequently to 1876, for the year ended 31st December; in 1871 for the six months ended 30th June; in 1872 and three following years for the twelve months ended 30th June; in 1876 or the eighteen months ended 31st December; and in subsequent years for the twelve months ended 31st December. The returns of private railways are for the year ended 31st December throughout.

[9] Post Office Savings Banks were first opened in 1865. Hence the increase in the amounts in these columns from that year. The returns for the Post Office Savings Banks are for the years ended 31st December, those for the ordinary Savings Banks are for the years ended 30th June.

[10] Until 1879 the figures did not give particulars of all the Friendly Societies in the colony, but only of such as furnished returns. For that and subsequent years the returns are complete.

[11] The increase in the number of telegrams commencing in 1870 was consequent on a reduction in the rates.

[12] Including purchase-money of the late Melbourne and Hobson's Bay Company's lines.

[1] This column presents a statement of the average numbers attending at one service only on the Sabbath, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connexion with some religious bodies, there are several services held on the same day, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.——[2] The figures relating to the Independent or Congregational, the Baptist, the Church of Christ, and the Roman Catholic Church are stated to be only approximate.

Note.—The returns of several of the denominations show smaller numbers than they did in the previous year, but it is questionable whether a falling off really occurred. It is to be regretted that some of the religious bodies do not possess any regularly organized machinery for obtaining accounts of their strength and progress. The same remarks apply to the Sabbath Schools, *post*.

[1] Including Bible Christians.

[2] The Spiritualists, although perhaps not strictly speaking Christians, are included under this heading.

[3] In the returns for 1875 the Wesleyan Methodist denomination, for the first time, furnished the "Average number of scholars attending." For previous years it returned the number on the rolls, which was different from the practice of other religious bodies.

[1] These amounts were received many years since. No Government aid has ever been given towards maintenance.——[2] Regular masters only. Visiting masters are not included.——[3] In connexion with the Melbourne Grammar School there are three council scholarships of the annual value of £21, for boys under 14, tenable at the school for three years; and two exhibitions of the annual value of £20, tenable for two years, open to the competition of boys proceeding to the Melbourne University, whose names have been for the two previous years on the school register, and who have passed the Matriculation Examination with credit. The Head Master offers for open competition, in February each year, two scholarships of the annual value of £30 and £25 respectively, and two exhibitions of the value of 15 and 10 guineas. The two senior scholarships and exhibitions are open to boys under 15 on 1st February every year; the two junior to boys under 13. There is also a "Witherby Scholarship," the holder of which claims exemption from school fees for three years.——[4] A scholarship of the value of £60 per annum, tenable for two years, has been given by Mrs. F. W. Armitage, the conditions of tenure being that the holder shall be a resident student of Trinity College, Melbourne, and shall have been for two years previously a pupil of the Church of England Grammar School, Geelong. The Head Master always receives one son of a clergyman of the Church of England as a resident boarder, exempt from all school fees and cost of residence. There is a Preparatory School for boarders and day-scholars attached to the school.——[5] In connexion with the Wesley College there is a scholarship called the "Draper Scholarship," which was established in memory of the late Rev. D. J. Draper, who perished in the *London*. It is of the value of £25, tenable for one year. Two other scholarships have also been founded by Mrs. Powell, to be called the "Walter Powell Scholarships," in memory of her late husband. They are of the value of £40 each, payable in two annual instalments of £20, and tenable on condition of the scholar pursuing his studies at the University. Accepted candidates for the Wesleyan ministry form a distinct division, but their admission is only a provisional arrangement awaiting the proposed establishment of a Theological Institution.——[6] St. Francis Xavier's College was opened during the year 1878, and many of the scholars were transferred to it from St. Patrick's, of which it is a branch.

* It is probable that the figures in these columns do not always indicate distinct individuals, but acts of relief, and that a person relieved over-and-over again is the cause of as many entries as he is times relieved.

Note.—The returns of some of the societies do not distinguish the sexes of the persons relieved, hence the sum of the males and females on the total line does not agree with the total of both sexes. The returns of receipts and expenditure represent the *net* amounts received and expended, exclusive of credit and debit balances, &c.
